SeaValue

Sea Value PLC. was founded in March 2004 as a holding company for two leading tuna processors, I.S.A. Value Co., Ltd. and Unicord PLC.

By combining the accumulated experience of the partners, Sea Value PLC. produces guaranteed excellent quality tuna using the most advanced manufacturing technologies in all our processing facilities. From the sea to the can, we seek high quality raw material and pay special attention to every single step to produce superior products to serve the world's market.

Sea Value PLC. provides excellent services and exceeds customer expectations and satisfaction. With a wide range of our successful products, Sea Value PLC. has delivered outstanding value to our customers and consumers all over the world.

FACTORY

I.S.A. Value Co., Ltd. has built its expertise in canned tuna through the years. Today, it produces wide ranges of high quality tuna daily with strict quality control guidelines followed throughout production.

Since its establishment in 1980, **Unicord PLC.** has dedicated itself to product development. Unicord's canned tuna, pouch tuna, and frozen products are well-accepted throughout the world under more than 350 brand names.

Sea Value Atlantic S.A.S. is specialized in the production of premium tuna, salmon and some other Seafood in both pasteurized as well as sterilized plastic bags for Foodservice and Industrial end users.

PRODUCT

Our human food products range from canned tuna, sardines, mackerel, pilchard and pouch tuna with a wide selection of packing media and styles. With a growing demand for specialized tuna products, we also offer frozen loin, value added, and ready-to-eat products to fulfill the market's needs. Our premium pet food lines are made with high quality ingredients and various food supplements to assure pet nutritional health.

STRENGTHS

EXPERIENCE

With more than thirty years of experience, Sea Value PLC. has been renowned in the industry for decades and proven itself to be one of the world's leading manufacturers of canned tuna. The key to success is our flexibility and ability to adapt to every specific need for all customers. Our well-trained operational staffs together with dedicated R&D experts possess strong knowledge, background, and expertise in the canned tuna business with the ultimate goal of constantly improving the operation for all our processing facilities. This is to guarantee top quality products to the consumers as well as ensure that we are in a position to serve any changes in consumers' needs.

CAPACITY

Today, SeaValue PLC. operates 6 processing facilities in Thailand and 1 factory in France with total capacity of over 1,000 metric tonnes/day.

Plant

Lignol, France
Established in 2012 Area: 8,000 sq.m.
Production capacity: 20 metric tonnes/day

SUSTAINABLE

Sea Value PLC. contributes and gives support in working towards more innovative and sustainable fishing method. The company is one of the founding members of the International Seafood Sustainability Foundation (ISSF), whose "scientific fact-finding" approach is being fully supported by major brands and retailers around the world. The goal is to bring fish populations up to biologically safe levels to ensure continuing viability of fisheries, aquaculture, and the fish processing industries. Sea Value PLC. also works very hard with our suppliers to ensure that the fish we put into each can is free from any illegal, unregulated, and unreported fishing practice.

SUPPLY CHAIN

One of our key strengths is the ability to form strategic partnerships with world's leading tuna suppliers. This can guarantee availability of raw material throughout the year to ensure that our factories will never be short of fish. Sea Value PLC. is also a majority shareholder of Borneo logistics Co., Ltd., who offers "full logistics and transportation services" that are tailor-made "to meet with customers' requirements". From our factories to target destinations around the globe, we provide one stop logistics service in order to achieve the best timely delivery for our customers.
